Here's Why Clean Energy ETFs Are Shining Bright

Clean or green energy has been hitting headlines these days for several reasons. Increasingly, big corporations are making or promising investments in achieving the most coveted carbon neutral status. Also, the green energy space has been a hot discussion topic in the ongoing U.S. election

Let's look at the factors that make the clean energy space a highly lucrative option for investors looking to enhance their portfolio

....

Joe Biden, the Democratic presidential candidate has been strongly campaigning for his clean energy and infrastructural plans. He aims to pump \$2 trillion into green energy for over four years to build solar panels, charging stations, etc. Under his tenure, Biden plans to build numerous wind turbines and solar panels across the United States to rapidly achieve zero-carbon energy. The plan will eliminate toxic emissions from the power grid by 2035 and increase

Several Countries in Race to Become Carbon Neutral

China, Japan, India, Brazil and European countries are among those that are strongly working on climate change. China is considered responsible for around 28% of global emissions, according to a BBC News report. However, the country is aiming to hit peak emissions before 2030 and achieve carbon neutrality by 2060, per Chinese President Xi Jinping's announcement at the UN

Clean Energy ETFs That Can Shine
