Is Invesco Global Clean Energy ETF (PBD) a Strong ETF Right Now?

Making its debut on 06/13/2007, smart beta exchange traded fund Invesco Global Clean Energy ETF (PBD) provides investors broad exposure to the Alternative Energy ETFs category of the market.

....

Sector Exposure and Top Holdings

While ETFs offer diversified exposure, which minimizes single stock risk, a deep look into a fund's holdings is a valuable exercise. And, most ETFs are very transparent products that disclose their holdings on a daily basis.

When you look at individual holdings, ... accounts for about 1.24% of the fund's total assets, followed by ... and

....

Performance and Risk

Year-to-date, the Invesco Global Clean Energy ETF has added about 3.21% so far, and is down about -13.63% over the last 12 months (as of 04/24/2023). PBD has traded between \$17.65 and \$25.04 in this past 52-week period.
